

DASSY® SINTRA (300544)

MIDLAYER JACKET

This midlayer is multipurpose and practical! Sintra has a 'cool' look thanks to the combination of different textures. For example, softshell fabric has been used in areas subject to greater wear such as sleeves and shoulders. Sintra has a PFC-free water-repellent finish, making it a perfect partner in colder and wetter weather conditions. What else? Stretchability and pre-shaped arms make this midlayer very comfortable to wear during work which involves a lot of movement. It also has a zipper that opens both ways. Partially made of recycled polyester. Seen in DASSY ViVid®.
