WE ARE DASSY

WORKWEAR THAT DOES THE JOB FOR YOU. Much more than just a slogan, that's our mission. DASSY offers workwear that's top of the range in terms of quality, functionality, design and sustainability. In doing so, we're enabling professionals to go about their jobs in a safer and more practical way, so that your team can give the best of themselves.

DASSY 
professional workwear

QUALITY

DASSY stands for quality, from fabrics to finish. We've purposefully chosen to work with OEKO-TEX® certified raw materials, the strongest materials combined with household names in the industry. These include YKK zips and ultra hard-wearing fabrics by Cordura®, which we use to reinforce our workwear in strategic places. Our collections are also extensively tested and certified: during the fabric production stage, in the lab and in the workplace by our DASSY Test Team.

DASSY products are professionally designed and constantly tested in typical work situations, so we know better than anyone which handy work pockets should go in which places. We also know that a good fit genuinely adds value to our products, so we offer a range of inside leg measurements to make sure that our knee protection is always exactly where it should be. Workwear that fits just right down to the smallest details is more practical and safe — and offers so much more comfort!

FUNCTIONAL

GOOD DESIGN

Good design is an indispensable aspect of our product development process. On this point too, our vision on sustainability is reflected in our collections. We don't pursue fleeting trends; instead, we purposefully opt for timeless and pure designs you can combine across our collections year after year. Our colours are perennial favourites, and our subtle accents and details make sure they are the perfect match for any contemporary look. In other words, you can count on your DASSY collection for years to come.

DASSY is also a sustainable entrepreneur, with a focus on people and the environment. We don't just deliver the goods when it comes to sustainable collections, 100% free from harmful substances, that stand the test of time; we've also made a very deliberate choice to offer the best possible working conditions to our teams in Sri Lanka, at our Bruges HQ and at our suppliers. We also prioritise efficient transport by sea and by road. We take care in the way we use energy, and we recycle and ban plastic wherever we can. We're also avoiding overstock thanks to our new, fully automated warehouse. And there's more, as there are no limits to sustainable enterprise. We will keep innovating — this is just the start.

SUSTAINABLE

ONLY THE BEST MATERIALS

The entire test process starts with the raw materials. Even at this point, strict quality and finish requirements are set by independent inspectors. From fabric to thread and from buttons to zips, all parts are checked in accordance with the OEKO-TEX® standards to make sure no harmful substances or chemicals are used.

DOUBLE CHECKED IN OUR OWN TEST LAB

As part of the initial fabric selection process, its colourfastness, resistance to shrinkage and wear, tear and tensile strength plus weight are extensively tested, both by accredited independent test centres and by the DASSY Experts in our own lab.

DASSY TEST TEAM

Once our products are ready to get working, our international DASSY Test Team springs into action. The DASSY Test Team is a growing group of professionals in different trades who assess the performance of our workwear, each from the perspective of their own jobs. They test our workwear day in, day out, in the conditions it was designed to be used in. Is it strong enough? Does it have enough pockets, all in the right places? And is it comfortable to wear?

In addition to our Test Team, we also work with trade specialists for specific collections. This has enabled us to adjust the pockets on our trousers on the advice of a group of painters, and add a multifunctional belt loop on the advice of a group of roofers.

Our D-FX Flex Painters subcollection, for example, was tested and perfected by 39 painters in three countries before it was truly ready to hit the market.

TESTED UNTIL IT'S GOOD ENOUGH FOR THE PROS

Based on the unfiltered opinions of professionals in the trade, our designers get back to work to fine-tune each of our prototypes until they fulfil the requirements of our DASSY Test Team and perfectly meet your needs. Tested and approved by and for professionals.

DASSY TEST TEAM

DASSY promises quality. Those are not just empty words: all DASSY clothing goes through a rigorous testing process. During the fabric production stage, in the lab and in the workplace: **TESTED BY A PRO.**

SUSTAINABLE

Sustainable enterprise with a focus on people and the environment these days than a voluntary responsibility. **So, how**

DASSY TEST TEAM

We are constantly striving to improve. We do so before our collections are launched, and long after. All items of clothing are tested in the workplace by our DASSY Test Team: professionals from all trades. Is our clothing practical? Is it comfortable? Is the material strong enough? The result: workwear tested by a pro.

TEAM SPIRIT

The wellbeing of our teams comes first, and we are realising exactly that through healthy and inspiring working conditions. In Sri Lanka, we offer healthy hot meals, transport to and from work and medical care. At our Bruges HQ, staff can wind down for lunch at our Dasserie restaurant, use the gym before or after work, and take part in a host of team events.

#WEAREDASSY!

PARTNERS IN QUALITY

Together with our partners Febelsafe, Centexbel, Amfori and SGS, we guarantee that our collections comply with the highest standards in the sector.

100% FREE FROM HARMFUL SUBSTANCES

We very purposefully opt for quality materials. We only use raw materials that comply with the OEKO-TEX® standard: all elements of our clothing are manufactured without the use of harmful substances.

AWARDS FOR THE BEST WORKING CONDITIONS

We have been a member of the AMFORI Business Social Compliance Initiative since 2014, a leading organisation monitoring and assessing workplace standards in the European and international world of commerce. Our working conditions across the entire chain are constantly assessed and improved where necessary in accordance with the eleven principles of the AMFORI BSCI code of conduct. Our approach is bearing fruit: we are proud to say that we achieved the highest possible rating in our most recent Amfori BSCI audit in Sri Lanka in 2021. We scored an A: excellent across the board. In 2019, we were also able to claim the Social Dialogue & Workplace Cooperation Award.

EFFICIENT TRANSPORT

Our boxes are made of 100% recycled cardboard and pass through a box sealing machine, meaning we transport less air. On top of that, since 2021, DASSY has been transporting items loose loaded from Sri Lanka to Bruges: entirely without pallets, film or plastic straps. That way, more items can be loaded into a single container, which is a more sustainable way of doing things.

ENTERPRISE

Environment has become more of a fundamental requirement
does DASSY go about its business on that front?

CAREFUL USE OF ENERGY

Our Bruges HQ is illuminated using energy-efficient LED lamps and skylights across the entire warehouse to maximise the amount of natural and ambient daylight. By 2017, we had already installed 860 m² or 430 solar panels on our roof, amounting to a total capacity of 148 kWp. Today, we have upped that to 554 or 1,108 m², amounting to a capacity of 216 kWp.

GREENER VEHICLE FLEET

We're already using e-bikes today, and we'll be introducing electric and hybrid cars in the future.

MINIMAL WASTE

Following the introduction of a baler, we now also use a cardboard compactor to shred and compress cardboard. That way, the waste we produce is even more compact — and being able to transport more waste per trip helps save fuel, of course. On top of that, we sort film waste and recycle straps, iron and IT equipment.

CLEAN WATER

We drink filtered tap water and drinks in our own flasks. We no longer have any plastic bottles delivered.

CONTINUOUS INNOVATION

Thanks to efficient processes in our new fully automated warehouse, we can prevent overstock.

TEST OF TIME

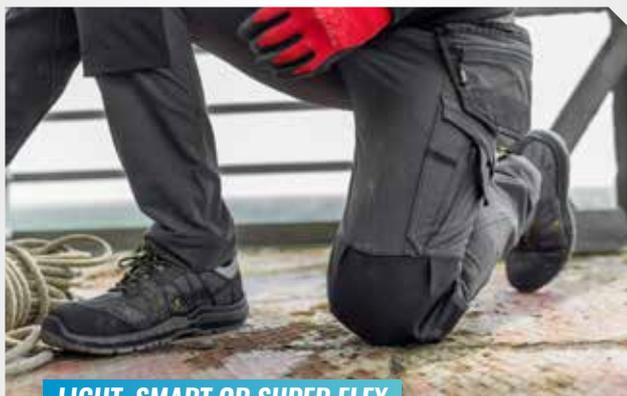

DASSY develops and produces professional workwear that stands the test of time. The longer our clothing lasts, the better for people and the environment. We will continue to focus on reducing the ecological footprint of our production and on sustainable and circular enterprise in the future.

D-FX FLEX

MAKE A MOVE

D-FX Flex enables all professionals to combine items of clothing and move with complete flexibility. Mix and match to suit your taste or corporate identity. Select a complete work and company outfit with your favourite features from 34 models and seven timeless colours. Super-strong fabrics? Contemporary style? Check. For men, women and everyone else? Bingo. And for superb wearing comfort, you can now choose between Light, Smart and Super Flex work trousers. Our D-FX Flex collection has it all.

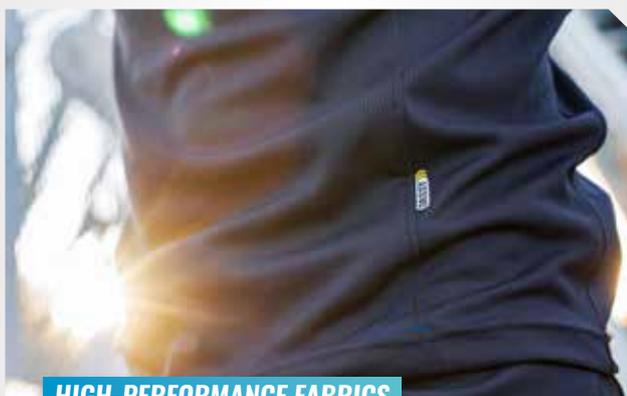

LIGHT, SMART OR SUPER FLEX

01

Work trousers in a stretch material of your choice: Light Flex, entirely in mechanical stretch, Smart Flex in mechanical stretch with extra 4-way Cordura® stretch at the back of the knees, inner leg and lower back, or Super Flex, entirely in 4-way stretch.

HIGH-PERFORMANCE FABRICS

02

Top quality and comfort you can count on in all seasons: wind- and waterproof in winter, and UV sun protection, anti-bacterial and quick drying in summer. Our fabrics can take a knock, are extensively tested and come fully certified — because professionals expect no less.

MIX & MATCH

03

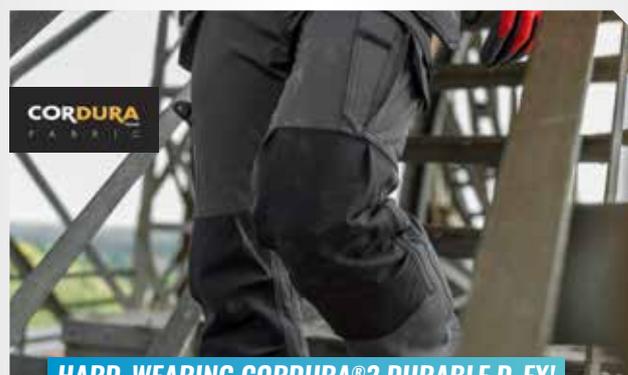

D-FX Flex enables you to combine items like a pro. A uniform work outfit in a single colour? Or a professional look in your corporate colours? The choice is all yours! Smart design down to the smallest details means everything in our D-FX Flex range is always perfectly matched, for both men and women.

A MODERN LOOK, ALSO FOR WOMEN

04

La conception dynamique de cette collection présente une coupe plus moderne et plus cintrée, avec de subtils détails réfléchissants. Pour les dames aussi, avec une coupe plus ajustée des hauts et des pantalons de travail.

HARD-WEARING CORDURA®? DURABLE D-FX!

05

All D-FX Flex items have the right fabric in the right place, with specially developed, hard-wearing Cordura®. The elbow area, utility knife and knee pockets, and the back and inside pockets keep their shape and are tear-resistant. That way, you can get the most out of your D-FX Flex workwear for even longer.

SUPER FLEX

MORE COMFORT AND EVEN STRONGER

Following Light Flex and Smart Flex, DASSY is now launching its *new Super Flex quality, entirely in 4-way stretch* for even more manoeuvrability in the workplace. This smart fabric blend provides for extreme flexibility, durability and the ultimate in wearing comfort. With their contemporary look, these four new work trousers can just as easily be worn outside of working hours too.

DASSY®

NORDIX

Wind- and waterproof but still breathable? Check! This compact stretch winter jacket has an insulated padded lining with high-quality DuPont™ Sorona® that retains your heat for hours on end. Nordix would look equally at home out on the ski slopes as keeping you warm on the work site in the colder months. Ready to see what the biting cold, piercing wind, never-ending rain and snow can throw at you?

PROTECTED IN RAIN AND SNOW

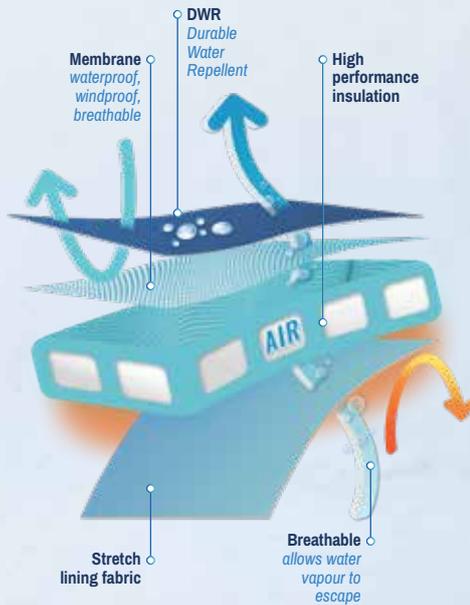

Stay dry on the outside

- » Water and windproof breathable membrane
- » Durable Water Repellent Treatment
- » 100% taped seams

Stay dry on the inside

- » Membrane stops rain and snow
- » Raindrops or snowflakes get no chance to permeate the fabric
- » Perspiration can easily escape

PROTECTED IN WIND AND COLD

All the benefits of staying warm...

- » High-quality DuPont™ Sorona® microfibrres
- » Microfibre forms small insulated air pockets
- » Body heat is retained for longer

...without the drawbacks

- » Outer fabric in stretch: flexible and comfortable
- » Lining is comfortably light, breathable and quick drying
- » Padding is made of 37% renewable materials

WR = Water Resistant.

MVP = Moisture Vapour Permeability.
The higher the MVP, the more breathable the fabric.

DASSY®

DASSY® DENIM

JEANS PLEASE

Whether at work or in your free time, jeans will always be a favourite among professionals. That said, casual jeans often aren't up to the challenges posed by work sites — and that's where DASSY work jeans come in to make all the difference for professionals. Choose how flexible your jeans are with 2-way or 4-way stretch. And choose between comfortable knee pockets or holster pockets specially finished with super-strong Cordura® for your tools.

SUPER FLEX

SLIM FIT IN STRETCH

01

This super-comfortable must-have with elastane offers you full manoeuvrability in an ultra-contemporary look.

WELCOME KYOTO

02

A newcomer to our range: Super Flex work trousers with knee pockets in 4-way stretch jeans. With the same comfort as Melbourne and Osaka, Kyoto completes our range.

DASSY®

CLASSIC

OUR ROOTS

With its timeless design and clever little details, DASSY Classic is a true jack of all trades. This collection offers the largest range of items and colours for men and women of all shapes and sizes. DASSY Classic is functional, durable and comfortable. That way, every professional can give the best of themselves and deliver top quality in our classic designs!

HUGE RANGE

01

DASSY CLASSIC is for everyone! Men, women and kids — for all professionals, in all trades.

VAST ARRAY OF COLOURS

02

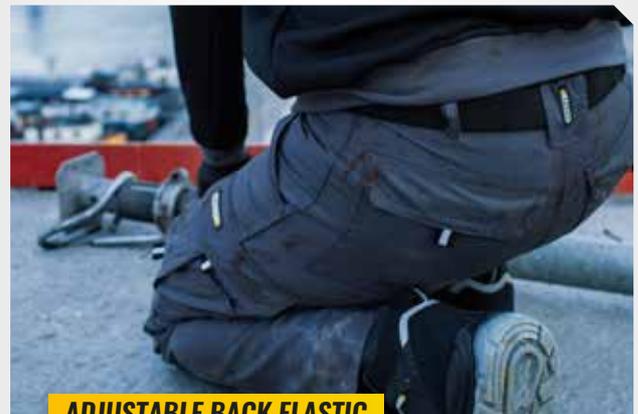

With a vast array of colours, this collection is guaranteed to match your company colour scheme.

NEED A LITTLE EXTRA LENGTH?

03

All Classic work trousers, brace overalls and overalls can be extended by 5 cm. Simply unpick the original hem to gain another 5 cm — all with another neatly finished hem, of course.

ADJUSTABLE BACK ELASTIC

04

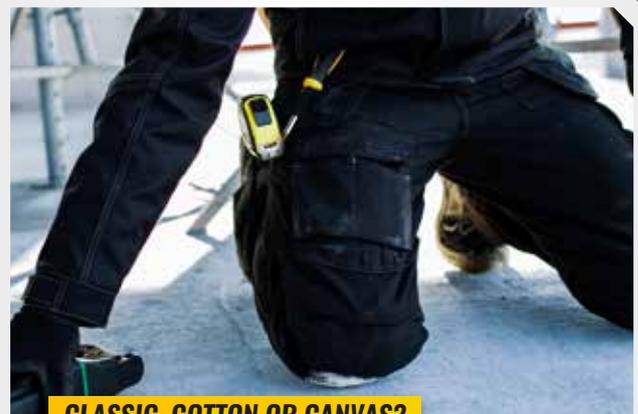

All Classic work trousers and shorts have an adjustable back elastic. That way, all trousers are always the right fit — and they stay exactly where they should be.

DURABLE THREE-NEEDLE STITCHING

05

The lifespan of your workwear is not just determined by the quality of the fabrics: the way they are stitched together also matters. We use three-needle stitching to give extra strength and durability.

CLASSIC, COTTON OR CANVAS?

06

Choose from three levels of quality: Classic for a strong polyester-cotton mix, Cotton for 100% cotton or Canvas for a robust canvas weave.

CLASSY CANVAS

01

Not the standard twill, but a stylish canvas fabric that combines a cool look with extreme durability and extreme comfort. Workwear with personality.

SOFT ON THE KNEES

02

Want to keep working in complete comfort? Use our DASSY® Cratos knee inserts in the knee pockets of our trousers. Adjustable for every height.

EXTRA STRONG WITH CORDURA®

03

Around the elbows and on every pocket: we make sure your workwear is extra strong exactly where you need it.

CONCEALED JEANS BUTTON AND ZIPPER

04

Limits the risk of scratching or electrical conduction while working.

EVERYTHING CLOSE AT HAND

05

Wallet, phone, keys: never lose your personal items again thanks to a handy, zip-up safety pocket.

DASSY® DNA

FINAL EDITION

PURE CLASS WORKWEAR. As a true professional, you only pick the best of the best, and you want to look the part when going about your job. After all, pure class is in your DNA. ONLY THE BEST PROTECTION

01

All of our Multinorm, Hivis and Flame Retardant safety clothing meets the strictest European standards. After all, prevention is better than cure. Better be safe than sorry!

MULTINORM? 5XSAFE!

02

Protect yourself against the five most common risks with our Multinorm collection. For the added benefit of extra safe visibility around the clock, go for Hivis Multinorm.

HIVIS DAY AND NIGHT

03

Safe and visible. On the clearest days, at dusk or in the middle of the night.

FLAME RETARDANT

04

Often work around heat or naked flames? Flame-retardant workwear makes all the difference.

LIGHTWEIGHT

05

Our shirts, shorts, trousers and jackets are available in different weights. In summer or in a hot workplace, go for lightweight without compromising on visibility.

DASSY®

SAFETY

YOUR PREVENTION

Safety at work: more than a must, it's a basic right of every professional in your sector. Limit the risk as much as possible with the ingenious safety clothing in our DASSY Safety collection. With our Multinorm, Hivis and Flame Retardant safety clothing, you can rest assured you meet the strictest European standards. What does your team need to get the job done in complete safety?

DASSY

HIVIS

SUPER FLEX

YOUR LIGHT

Overcast days at work? Doing a night shift? High-speed traffic nearby? **Protect your team and make sure they are always as easy to spot as possible.**
 The DASSY Hivis collection complies with the European standards for high-visibility clothing and offers protection in line with Class 1, 2 and 3

Every item of clothing comes certified according to the European ISO standards, and the Hivis-Multinorm collection also complies with EN ISO 20471.
 The garment label will tell you which standards it complies with. All the information you need can be found on p. 110.

DASSY now also launches the Camden mid-layer jacket, the Limasol winter parka and the Evans zipped hoodie.
 Other new items in this collection include three work trousers with 2-way stretch: Princeton, Minnesota and Aruba.

DASSY®
MULTINORM

YOUR DEFENCE

Extreme heat, risk of explosion or liquid chemicals? **Protect your team when working in hazardous environments with safe, multifunctional workwear.** DASSY Multinorm complies with the five most commonly requested European standards for flame retardant protection: welding, electric shock or electric arc and chemicals.

All items of clothing come certified in accordance with the European ISO standards, and Hivis-Multinorm also meets EN ISO 20471. The garment label will tell you which standards it complies with. All the information you need can be found on p. 110.

DASSY®
FLAME RETARDANT

YOUR SHIELD

Ideal for those who work in hot conditions or surrounded by open flames and weld spatter, this flame-retardant safety clothing features concealed metal fastenings, pockets with flaps and a flame-retardant finish; all combine to delay the spread of fire.

All items of clothing are certified in accordance with the European ISO standards for welding and heat-resistant clothing. The garment label will tell you which standards it complies with. All the information you need can be found on p. 110.

DASSY® THERMAL

YOUR SECOND SKIN

Toasty warm and odour free all day long. Take on any cold work environment with a thermal T-shirt and trousers: the ideal base layer for all professionals. Soft on the skin, highly breathable and moisture wicking thanks to ventilation zones.

Choose *Thermal Merino* for sedentary, kneeling or driving jobs, or pick *Thermal Active* for a job where you'll be on the move. The comfortable body-mapping design with stretch sits tight to the skin and keeps its shape thanks to extra reinforcement. Both Thermals provide all the warmth you need, with full-length sleeves and legs.

THERMAL ACTIVE

01

The perfect partner for active jobs in cold work environments. For people who are on the move all day long. Thanks to its Prolen® Siltex antibacterial yarn, this underwear is comfortable, breathable and quick-drying. Combine our Pierre thermal T-shirt with our Pascal thermal trousers.

THERMAL MERINO

02

The perfect partner for sedentary, kneeling or driving jobs in cold work environments. Merino is soft on the skin, provides natural antibacterial properties, is breathable and dries quickly. Combine our Theodor thermal T-shirt with our Tristan thermal trousers.

FABRICS

Quality starts by selecting the right fabric. Here at DASSY, all fabrics are carefully selected depending on the function of the garment. The lexicon provides a detailed explanation for all technical terms. In addition to a commercial name, we also give fabrics an internal code and name. The table below also shows the composition, weight and properties of each type of fabric.

FABRIC CODE	FABRIC NAME	COMMERCIAL NAME	COMPOSITION	WEIGHT	PROPERTIES
5005	PA 05	Cordura®	100% polyamide	±220 g/m ²	<ul style="list-style-type: none"> • superior durability thanks to Cordura® fibre • used to reinforce clothing
5006	PA 06			±285 g/m ²	
5007	PA 07	Cordura® stretch	92% polyamide - 8% elastane	±350 g/m ²	<ul style="list-style-type: none"> • superior durability thanks to Cordura® fibre combined with the comfort of 2-way elasticity • used to reinforce clothing (e.g. knee pockets, elbows)
2041	PESCO 41	polyester - cotton	65% polyester - 35% cotton	±245 g/m ²	<ul style="list-style-type: none"> • durable and wear-resistant fabric with high colour fastness, even in case of regular high-temperature washing • extra supple finish for improved wearing comfort (PESCO 41) • mechanical stretch for increased freedom of movement (PESCO 41 - PESCO 63) • water-repellent finish (PESCO 63)

SAFETY FABRICS

FABRIC LEXICON

- **4-way stretch:** provides optimal freedom of movement. This fabric is strong and stretchable in all directions.
- **CO:** cotton
- **Cordura®:** an extremely robust and hard-wearing high-tech material made from polyamide fibre. Complies with the strictest standards in terms of strength and durability. Cordura® is used to reinforce elements that are subject to intensive use, such as pockets, knees and sleeves. This fabric holds its shape and is water and dirt repellent. Cordura® is a registered trademark of INVISTA Inc.
- **DWR or Durable Water Repellent:** a water-repellent finish.
- **EA:** elastane
- **Extra light fabric:** certain garments have been designed with several different fabrics. If you are using them in a hot working environment or for intensive tasks, go for extra light fabric.
- **MVP or Moisture Vapour Permeability:** expresses how breathable the fabric is. This is measured in relation to how fast the moisture vapour can escape. The higher the MVP, the more breathable the fabric.
- **OEKO-TEX®:** the OEKO-TEX® standard applies to all of our collections: 100% free from harmful substances.
- **PA:** polyamide
- **PES:** polyester
- **PP:** polypropylene
- **UPF 50+:** work clothing with UPF 50+ protects you against 98% of the harmful UV rays from the sun.
- **WR or water resistance:** expresses how much precipitation a fabric can handle before it permeates the fabric. The higher the WR, the longer you can continue working in poor weather without experiencing any discomfort.
- **WO:** wool

SIZE GUIDE

True professionals always deliver the right fit. That's why every country has its own sizing system. All available sizes for each garment are set out below.

Most of our collections fit well for both men and women, due to their unisex fit. That said, we do also have specific garments with a more tailored silhouette for women. That's why our Classic and D-FX Flex collections show sizes for men, women and even kids. On the other hand, our Denim, DNA and Safety collections show unisex sizes only.

TROUSERS: ALWAYS THE RIGHT FIT

Different inside leg lengths. The majority of our work trousers are available in a range of lengths: *minus* measuring 75 cm or 30", *standard* measuring 81 cm or 32" and *plus* measuring 87 cm or 34". This will ensure the functional pockets are always in the right place, no matter how tall you are.

Adjustable hem. Not only that, most work trousers, brace overalls and overalls can easily be lengthened thanks to the handy adjustable hem. Simply unpick the original hem to gain another 5 cm — all with another neatly finished hem, of course.

	Minus -6CM -2"	Standaard	+6CM +2" Plus
Inside leg length	75cm 30"	81cm 32"	87 cm 34"
Length with large hem	80cm 31"	86cm 34"	92 cm 36"

Plus and minus are available in the following sizes:
 BE FR ES PT size 40 to 54
 DE NL PL HR IT CZ size 46 to 58
 FI SE DK NO EE LT LV IS size c46 to c58
 UK size 31 to 43 and UK denim size 28 to 42

SPECIAL SIZES

We've got all of the most commonly requested sizes in stock for you. Looking for a smaller or larger size? Or would you like a specific item from our men's collection in a women's size? We can arrange this subject to a surcharge. Feel free to get in touch for further advice.

TAKING YOUR MEASUREMENTS

How to take your measurements?

Follow the drawing from step 1 to 4. Men can skip the third step. Measure as close to the skin as possible. Make sure the measuring tape stays tight to your body. Make sure you use the right units: either measure everything in inches, or everything in centimetres.

Having your measurements taken by someone else?

Stand up perfectly straight, with your legs slightly apart. Have your measurements taken while breathing in and out.

1. Take your chest measurement at the widest point.
2. Take your waist measurement at the height you wear your trousers.
3. For women only: take your hip measurement at the widest point.
4. Take your inside leg measurement from your preferred crotch height to your preferred trouser length.

SAFETY STANDARDS

DASSY Safety is made up of multiple subcollections: Flame Retardant, Hivis, Hivis-Multinorm and Multinorm. Different standards apply to each of these subcollections. More information can be found on the label in each garment, and on the pages that follow.

Each of these standards sets out specific safety classes, requirements and testing methods that have been agreed at European or sometimes international level. Some standards apply across multiple classes. The higher the class, the better protection the garment offers.

All of our safety clothing also complies with EN ISO 13688:2013+A1:2021. This is the general standard defining the requirements for protective workwear, such as basic health & safety and ergonomic requirements, as well as the sizing, ageing, labelling and user instruction requirements.

HIVIS HIGH VISIBILITY EN ISO 20471:2013+A1:2016

x Mandatory for anyone who works on roads, highways and construction sites. Even if you only spend part of the day working on a site with moving traffic, safety clothing is always mandatory. This safety clothing keeps you safe and visible, both during the day, at dusk or dawn, and at night.

The more fluorescent and reflective, the higher the class

These three classes are determined by the fluorescent and reflective material per m² on the safety clothing. The more fluorescent and reflective, the higher the class. In other words, Class 3 is safer than Class 1. Combining multiple classes in a single work outfit can result in a higher safety class. Find out which safety classes are mandatory for your job and click here to discover which combinations result in a higher safety class.

CLASS	Surface area of fluorescent material (m ²)	Surface area of reflective material (m ²)
1	0,14	0,10
2	0,50	0,13
3	0,80	0,20

CLASS 1

Mandatory for anyone working on roads with traffic moving at up to 30 km/h. Also mandatory for visitors to sites where Class 3 is mandatory. Visitors must be accompanied by someone working on the site. If the work you do varies over the course of the day or if you are not sure, we recommend that you go for Class 3.

from 0.14 m² fluorescent material per m²
from 0.10 m² reflective material per m²

CLASS 2

Mandatory for anyone working on roads with traffic moving at up to 60 km/h. Also mandatory for visitors and supervisors at places where Class 3 is mandatory, and for those who need high visibility, even in clear weather.

from 0.50 m² fluorescent material per m²
from 0.13 m² reflective material per m²

CLASS 3

Mandatory for anyone working on roads with traffic moving at more than 60 km/h. Also mandatory for anyone working on construction sites, rail tracks and in rescue operations.

from 0.80 m² fluorescent material per m²
from 0.20 m² reflective material per m²

Customised Hivis?

No problem! Of course, any customisation will leave you with less surface area for fluorescent material, and it is important your safety clothing continues to meet the safety requirements. To ensure that your mandatory safety class is still fulfilled, DASSY will request prior approval from an accredited body. Ask your safety advisor for more information on safety classes.

COLD AND RAIN

COLD WORK ENVIRONMENTS **EN 14085:2004/2017**

Air temperature down to -5 °C
Protection against cold. Wearing head, hand and foot protection is mandatory under EN 342: 2017, and optional under EN 14058:2004/2017.

RAIN **EN 343+A1:2007, EN 343:2019**

Protection against rain and snow, fog and damp ground. These garments, their fabric and seams have been tested for their resistance to moisture and their water permeability. The 2003 and 2007 standards consist of three classes, while the 2019 standard consists of four classes.

COLD **EN ISO 342:2017**

Humidity, wind and air temperature ≤ 5 °C
This safety clothing must be worn closed and the cuffs and waist must be adjusted to your size in order to meet the standard. Depending on how the clothing is washed or whether it is worn wet, its thermal insulation value may be reduced.

WORK IN A KNEELING POSITION EN 14404:2004+A1:2010

Protection for those who do their jobs kneeling down. Use DASSY work trousers with certified knee pockets in combination with DASSY Cratos® knee protection. Cratos offers Type 2, Level 1 protection: suitable for flat surfaces and inclines, and protection against penetration by objects smaller than 1 cm.

MULTINORM

ELECTRIC ARCS **IEC 61482-2:2009/2018**

Protection against electric arcs. An electric arc as a result of a fault, such as a short circuit, can cause severe burns, as can lightning hitting an electrical installation.

This standard has different classes. Class 1 protects against electric arcs caused by short circuit of up to 4 kA lasting for 500 ms.

WELDING AND ALLIED PROCESSES **EN ISO 11611:2007/2015**

Protection against welding spatter, brief flame contact, radiant heat, accidental contact of up to approx. 100 V and electric shock. Flame spread is tested in the event of surface ignition (gives Class A1), and edge ignition (Class 2).

ELECTROSTATIC CHARGE **EN 1149-5:2008/2018**

Protection against fire or explosions caused by electrostatic charge. Section 5 of the EN 1149-5 standard describes the performance requirements for anti-static clothing.

HEAT AND FLAMES **EN ISO 11612:2008-2015**

Protection against heat and flames. Safety clothing compliant with this standard is allocated an index letter and number. The higher the index number, the better the protection provided by the garment. Complies with the standard including when the head and hands are entirely covered.

LIQUID CHEMICALS **EN13034:2005+A1:2009**

Protection against light splashing or light spray of chemical liquids. Type 6 safety clothing is suitable for low-risk situations in which a complete liquid permeation barrier is not required. Complies with the standard only when the upper and lower body are entirely covered.

UV RADIATION EN 13758-2:2003+A1:2006

Protection against the sun. This safety clothing with Factor 50 ultraviolet protection blocks 98% of the sun's harmful radiation. Protection is reduced when the fabric is wet, stretched or worn out. Use protective sunscreen for any uncovered body parts.

PRODUCT CARE

Washing and drying your items the right way is not only better for the environment, it also extends the lifespan and guarantees the functionality of your work clothing. Always make sure you follow the industrial or home laundry symbols on the laundry label: they're tailored to the most delicate part of your garment.

INDUSTRIAL OR DOMESTIC WASHING?

Sending your items to an industrial laundry is always a good idea, as they will be washed on a large scale, using the right detergents and in special washing and drying machines. As such, we recommend that you use a professional laundry service for your work clothing.

For garments in the Safety collection, using an industrial laundry service is not just a recommendation — these items must always be washed professionally. In the case of items from our Safety Hivis collection, make sure you locate the *max 50 cycles* instruction on the CE label. This maximum number of wash cycles must not be exceeded, as it is critical your Safety work clothing remains compliant with the legal safety standards.

INDUSTRIAL LAUNDRY SYMBOL

This internationally recognised symbol can be found on the laundry label of all work clothing that has been specially developed for industrial washing and drying. These items have been tested and approved in accordance with EN ISO 15797:2017. The numbers 1 to 8 represent the various test procedures: Does the item keep its shape? Are the seams hard-wearing? Is the material strong enough? Is the item colourfast? The laundry tests are performed at 75 °C and 85 °C, on both PRO 4 white loads, and on PRO 8 coloured loads. A tick in the top right corner shows whether the wet work clothing should go in the tumble dryer, and a tick in the bottom right corner shows whether it should go through the tunnel finisher before being dried.

TIP:

In this catalogue, our *DASSY Quality Wash* symbol is shown for all clothing that has passed our shrinkage and colour fastness test at 75 °C. That's how we test for quality. Always carefully follow the instructions on the laundry label.

CUSTOMISATION

Your team acts as the calling card for your company. When your staff radiate unity and confidence, your (potential) customers are more likely to feel reassured and satisfied. For that reason, smart company outfits are essential for a positive image. Your team stands for top quality, and that should be reflected down to the smallest detail.

MIX AND MATCH WITHIN YOUR UNIFORM LOOK

DASSY offers everything you need for a complete and professional look for your team. Simply choose a uniform company outfit from our huge range to promote the team spirit among your staff. Even within this uniform look, your employees will still be able to add some variety by mixing and matching to suit their own preferences.

YOUR LOGO IN THE SPOTLIGHT

Looking to set yourself apart more effectively, increase your brand awareness and generate more revenue? Make sure you get noticed by putting your logo in the spotlight. Select a clearly visible location for maximum effect. For trousers, add your logo to the leg or rear pocket. For jackets, put it on the back, and for sweatshirts, give it pride of place in the chest area.

CHOOSING THE APPLICATION METHOD

Various methods are available to apply your logo. An embroidered logo is ideal for fleece jackets, but much less suitable for work clothing that needs to stay waterproof. Screen printing or digital transfer printing are perfect for T-shirts and polo shirts.

A PRINTING ZIP? GENIUS!

Our lined jackets and body warmers come with a special printing zip on the bottom so your logo can be applied more easily. Genius, right? That way, only the outer fabric needs to go on the printing plate. The result: you get a neat and uniform print of your logo.

CUSTOM SAFETY CLOTHING

Safety clothing can also be customised, as long as you respect and can continue to meet all the safety standards. Page 110 provides all the information you need on customising safety clothing. Speak to your safety advisor to find out more about the options and ask your dealer for advice.

YOUR DASSY DEALER IS READY TO HELP

Got questions about customising our work clothing? Not sure about the right method to use to customise your items? Ask your DASSY dealer for more information. Alternatively, if you are looking to lift your company outfits to an entirely new level, your dealer will be more than happy to introduce you to an entire collection of professional work clothing customised to your activities, your team and your corporate identity.

COLOURS

Each item in every collection is available in several colours.
If you're looking to place an order, please refer to this overview to see our unique colour codes.
